

Art Curriculum Intent

Implementation

Our uniquely creative curriculum will provide learning opportunities to teach explicit skills for both Art and DT, these two subjects will be taught alongside each other to enhance the children's learning experiences.

In KS1 the curriculum for Art is divided into the two separate year groups (a yearly cycle in both year groups). This is to ensure that whilst both year group cycles cover the same history topics, the skills taught are progressive. In KS2 the curriculum for Art is split into two 'cycles' (cycle A & B). Each cycle contains an Art unit every term of the academic year. IN KS2 lessons will be planned and taught within the key stages, there will be equal emphasis between Art and DT and links to other areas of the curriculum will be made explicit.

A teacher sketch book will be used to model the design process, key skills and final outcomes for each unit of work. In Art an individual sketch book will evidence a clear progression of skills throughout the key stages and in DT the design process will be followed and built upon as the children progress through the school. This will teach and inspire the children to practise and develop their ideas and skills within their sketch book, which will enable their progress and success to be evidenced and shared.

The children's creations will also be shared and celebrated through a whole school annual Art

Enrichment

A variety of experiences will ensure the children have access to an enriched curriculum to further enhance the progression of their skills and develop an appreciation of key artists and designers.

- Outdoor learning
- Whole school art exhibition
- Links with local secondary schools
- Curriculum visits and in school visitors

Intent

At Havannah Primary School our intention within the Art curriculum, is to develop within our pupils a deep sense of enjoyment, appreciation and love of art and design.

To teach fundamental skills that the children can apply, develop and build upon throughout their learning journey. Our curriculum will include a balance in focus and time dedicated to the teaching, developing applying and improving of many new art skills, which will all be documented in an individual sketch book. We intend to work with a range of mediums to develop a broad range of skills, to encourage enjoyment of the subject and enhance final outcomes. The children will Study key artists and develop an understanding of art within historical timelines, which will inspire the methods we use. and final outcomes produced.

Impact

The outcomes in Art will be presented in individual sketch books, which will demonstrate a broad and balanced curriculum, that offers pupils a variety of creative opportunities, investigating significant artists and a range of processes integral to the work of these artists.

Pupils review and practise their skills throughout the unit, demonstrating and recalling their developing skill base within their sketch book, which they will use throughout their school career.

Our Art curriculum demonstrates progression across key skills: drawing, painting and sculpture. Within these key skills the children will experiment with colour, texture, form, printing
